

# FRIENDS OF

## *Dog Kennel Hill Wood*

Common medlar or  
Dutch medlar  
(*Mespilus germanica*,  
var. Nottingham).

Planted 14.11.2013.

Medlars are ornamental, flowering trees with pretty blossom, good autumn colour and fruits which are edible, although not to everyone's taste.

Considered the best flavoured Medlar, producing a heavy crop of medium sized fruits with a interesting caramel flavour. Medlar trees have a flat topped weeping habit, with large white spring flowers and attractive leathery leaves that turn to shades of golden orange in autumn. This tree should provide fruits in 2015 and by 2017 be cropping well.

*Mespilus Germanica* Nottingham 1/2 standard grafted onto a Quince A stock.

**BUILDING  
SOLUTIONS**

This tree was donated by GB Building Solutions. It loves to be given a drink of water and please feel free to pour some into the watering tube.
